

Oil Additive

Description

Colloidal solid lubricant suspension based on molybdenum sulfide (MoS₂) in mineral oil. The product forms a high-load lubricating film on all rubbing and sliding surfaces. This in turn reduces friction, providing for smoother operation of assemblies and greater engine economy. Tested for turbochargers and catalytic converters.

Properties

- reduces oil and fuel consumption
- reduces running-in and operating wear
- no deposits
- highest thermal stability
- absolutely compatible with filters
- mixable with all commercially available motor oils
- increases smooth operation
- outstanding emergency-running properties
